

# Mile High

Wagyu Experience 2018

JANUARY 17<sup>TH</sup>, 2018

COWBOY  LOUNGE

DENVER, COLORADO

JANUARY 17<sup>TH</sup>, 2018

DENVER, COLORADO

### **SALE LOCATION**

The sale will be held at:

The Cowboy Lounge • Denver, CO  
1941 Market St., Denver, CO 80202  
303-226-1570

### **GENETIC CONDITIONS**

• All genetics selling in this sale are free of any and all known genetic conditions unless otherwise stated within each individual lot's footnotes within this catalog.

### **LIABILITY**

• All persons attending the sale and related functions do so at their own risk. James Danekas & Associates, Inc., its employees, all sale representatives and sale consignors assume no liability, legal or otherwise, for any accidents, damages, or injuries that may occur.

### **INTERNET/ABSENTEE BIDDING**

Real-time bidding for the "Mile High" sale is available via the internet through [www.liveauctions.tv](http://www.liveauctions.tv) Live audio and live video will allow registered buyers to bid on the animals just as they were present the sale day. A buyer account must be created prior to the sale. Please visit <http://www.liveauctions.tv> to create an account and request a bidder number. Instructions are available to walk you through the account set up process. If you cannot attend the sale because of weather, distance or business conflicts, please use LiveAuctions.tv. Buyers who would like to bid via internet must register with LiveAuctions.tv prior to the start of the sale. If you have questions, call the support line at: 817-725-8595.

### **TERM & CONDITIONS**

- All sales are final and must be paid before shipment can be made. Absentee buyers & internet buyer payments can be wired to the sale management's custodial account before cattle are released to the buyer.
- Semen/embryos will be released to the buyer once payment has been made. Shipping arrangements and all costs associated for semen & embryos are the buyer's responsibility. **Semen and Embryos sell per unit/embryo times the number within the package.**
- Conception rate of all embryos is not guaranteed unless individual sellers determine so - this information will be found within each individual lot's footnotes within this catalog if a guarantee of any kind comes with the purchase, otherwise, there are no guarantees on the embryos.
- Shipping expenses of any and all live animals will be the buyer's responsibility - seller and buyer will work together to establish all shipping arrangements. All lots become the buyer's risk once purchased. After purchase, all costs are the buyer's responsibility. The recommended hauler for live lots is Lathrop Trucking: 847-426-5009
- All costs for exporting lots are the buyer's responsibility and expense.
- All pick/choice lots of live animals will be between the buyer and consignor; all shipping arrangements and transfer fees/processing.
- Any errors, updates, or changes in information contained in this catalog will be included in a supplement sheet and/or announced from the auction block on sale day. Announcements from the block take precedence over the catalog and any prior released information.
- Sale management is not responsible for any embryo, conception and/or pregnancy guarantees. Any discrepancies are between the buyer and the seller.

- **SELLING 100% SEMEN RIGHTS AND POSSESSION**
- **CURRENTLY LOCATED IN QUARANTINE FOR COLLECTION AT HAWKEYE BREEDERS - ADEL, IOWA**

• The full sib to this bull, “Michiyoshi”, made tidal waves in the breed for his highly desired carcass genetics, consistency within his progeny and overall eye appeal. He was the number 5 marbling bull and had a ribeye EPD of +.58. Semen from the original Michiyoshi has sold in public auction for \$1000 per straw and has sired many highly desired matings. Unfortunately, the original Michiyoshi has passed and with a bit of a semen debacle, those original genetics are either impossible to find or once found, worth more than most can afford. Here in Lot 1, we have a reincarnation; a full sibling to the original Michiyoshi! This time, the only difference is Lot 1 is even better; he’s got more style and **qualifies for Australia, South Africa and the EU semen exports**. You better be ready to handle numerous phone calls as the new owner of this bull will be taking non-stop semen orders from all over the US and the World. The future of this bull will not only hold semen sale potential but could quite possibly change the breed with the remarkable genetics that this pedigree carries. Lot 1 has double copies of the Stearoyl CoA Desaturase gene, SCD: AA. He also possesses seven of the eight Pfizer high marbling genes, five of the six tenderness genes and seven of the eight feed efficiency genes. His sire, Sanjirou, is a linebred Yasumi Doi J10328 bull. Yasumi Doi J10328 sired Yasutanidoi J472 and grandsired both Fukutsuru 068 and Yasufuku 930. Sanjirou is out of the prominent Japanese cow Suzutani, who represents one of the most potent bloodlines in Japan. Her great-grand sire, Yasumi Doi J10328, is widely known for his ability to produce excellent meat quality and size. Suzutani’s sire was Tanishige 1526, whose progeny test results demonstrate that he has heritable traits with a BMS score +3.1 (above the national average of +2.1) and a yield grade of 72.7 %. Lot 1’s offspring will carry a copy of the High Marbling Exon 5 genes Type B or C. Look to Lot 1 if you want to be a part of the hottest new bull in the breed whose genetics are proven for superior performance in marbling, ribeye size, back fat and carcass yields!

- AI'D TO MFC ITOMORITAKA 443B ON 11/09/17
- Lot 2 has Michifuku on both the top and bottom sides of her pedigree! This royal mix of genetics also includes the great Suzutani, the dam of her sire. Her sire, WKS Sanjiro, has the potential of being the most influential Tajima sires with consistent high quality carcass traits. Lot 2's direct dam, LMR Ms Michifuku 612S, is an 11-year-old who has produced over 22 offspring via ET, AI and Natural Service and 48 viable embryos. Her progeny's carcasses continue to improve with impressive IMF% data. Lot 2's EBVs excel in the carcass department with a +7.2 for eye muscle, +0.4 for marbling and +0.09 for marble fineness. If you want to improve carcass genetics, Lot 2 will do it! Just starting her career, she's got a huge future ahead of her. Quiet and docile; don't miss her!

- RED
- P.E. TO "BRADY" (LAG HEART BRAND 2627A)
- An excellent Kaedemaru #2 by Heartbrand Red Emperor breeding. This heifer is currently pastured with LAG HeartBrand 2627A aka "Brady" and should be bred at the time of the auction. Lot 3 is superbly bred in her own right but the calf she is carrying could possibly be better. Lot 3's breeding is one of Legendary's High Mitsutake breeding heavily influenced by Dai 3 Mitusmaru and Dai 10 Mitsumaru and combines Big Al, Akiko, Dai 8 Marunami and Tamamaru into one package. Breeding her to Brady was an obvious choice for us...in addition to adding conformation strength, we saw exciting potential to improve marbling and yield grade. Given our history of working with Kaedemaru and Kaedemaru #2, we expect the calf to be a little darker red, tall and upright, and longer than average. This is a chance for you to leverage the work that's been going on at Legendary for the past couple years and own an animal that looks very much like one of the original imports. There are very few bulls that won't match up with 1072, so your flushing potential is endless. If she's not bred at the time of delivery, Legendary will provide 2 straws of semen.

• Lot 4 is an exciting young bull with a pedigree blended for an optimal balance of great carcass potential along with exceptional performance. The dam of Itoshigetaka is Eve. At the time Eve was born she had 5 maternal brothers ranking in the top 20 for marbling in the US, and is a pairing of the elite JVP Kikushige cow with leading marbling offspring and the Westholme 002 bull who excels in growth rate, rib eye size and superior maternal performance. We believe Eve is one of the premier growth rate Wagyu in the breed. CMC Itoshigetaka's sire is the exceptional marbling sire Itoshigenami. The data from Australia strongly indicates Itoshigenami was the best of all the import bulls for marbling percent. Itoshigenami also has the potential to produce cattle with very good growth when properly mated. Itoshigetaka has superb performance and structure. Weighing almost 1800 lbs. at only 20 months, Itoshigetaka was created to produce efficient well marbled offspring with fine marbling. To get this kind of performance from a 5/8ths Tajima sire is extraordinary. If you want to produce high value efficient cattle, don't miss Itoshigetaka. Itoshigetaka is a maternal brother to RMW Katana.

• **SELLS BRED TO SR Y13 SANJI**

• UKB Itokitasuru 114D (FB26989) is a rare genetic combination. 114D's dam, UKB Ms Itokitasuru, is sired by Itokitasuru Doi the only son of Westholm 007 in North America. (Westholm 007 is a 3/4 brother to JVP Fukutsuru 068). 114D's maternal grand dam is a daughter of UKB Dia 6 Kitaseki, the only son of Westholme 006 in North America. 114D's maternal great grand dam is a full sister to the dam of Genesis and Eve. 114D's sire is UKB Mr Yasushigefuku, a proven sire at Ultimate Kobe Beef who sires exceptional daughters, is a blending of Kedaka, Itozakura and Tajima with 005, 003 and JVP 931 in his pedigree. The sires in the pedigree of 114D are important because they are not just great carcass producers but also produce balanced functional females with above average maternal value. 114D is bred to a great carcass bull, SR Y13 Sanji who is a Sanjirou son from one of the best 003 daughters, Kitatemako.

 • Bragging rights begin once you're the owner of this exceptional being! That's right, this female has it all; her pedigree carries the great Sanjirou whose dam is the famous Suzutani. If your wanting to add a punch of positive carcass genetics, the top of this pedigree will take care of that in one generation. On the bottom side, Lot 6's dam is a direct product of the famous Crescent Harbor program. A daughter sired by a Red Wagyu was featured in the 2016 European Wagyu Gala and was an AA - 7. She has the influence of Kitaguni Jr who just recently sired a \$40,000 top seller at the Celina Cattle Company sale in December to a breeder in South Africa. To add even more value to this lot, this female sells safe in calf to an Itozuru Doi son. Just imagine that calf next to this big hipped royally bred female; they would be the highlight in any program!

 • Power in the blood of Lot 7! The dam of this female was one of the high sellers at \$15,000 at the 2016 Bar R production sale. Good thing she is young because the buyer of this female will be sending her directly to an embryologist as she has donor potential written all over her and her pedigree. Her dam's mother was the last importations by World K and her sire, is bred the same way...that's right, Lot 7 is a double bred Sanjirou and Nakagishi 5! This only doubles up the amazing traits these two individuals bring to the table. We're talking carcass galore! With only four offspring registered from Nakagishi 5, it is safe to say that Lot 7 is a very rare opportunity. Bar 57T is only one of two daughters of the great Nakagishi 5 alive today and we find her not once, but twice in Lot 7's pedigree.

• **BUYER'S CHOICE BETWEEN A HEIFER CALF AND A BULL CALF - CONFIRMED PREGNANCIES**

• Wow! Look at what we have here...the buyer's choice of either a bull calf or heifer calf from the second highest selling female in public auction in the U.S, MFC Ms Hisako 3-17 and the hottest bull in the breed, Sanjiro 3. Yes, you heard it right, an opportunity to own one of the most sought after matings in the World. MFC Ms Hisako 3-17 just recently sold in the Muddy Flats dispersion sale for a whopping \$46,000. Not only is this female maybe the most beautiful Wagyu female to look at, her pedigree is a cocktail of only top shelf. Once a donor at Muddy Flats, she is sired by World K's Kage, a bull known for great growth potential and when it comes to phenotype, he is very long spined and correct in his structure. Her direct dam, Hisako, is 100% TAJIMA and purchased directly from the World K group. Hisako is sired by JVP Fukutusuru-J068, who is known for extremely high quality carcass traits as reflected in all of the progeny tests done in the United States. In other words, MFC Ms Hisako 3-17 is a perfect blend of performance and extreme carcass quality while looking good doing it. If that's not enough, we add that extra punch of carcass merit to this mating with the #1 bull in the Wagyu breed, Sanjiro 3 (2017 WSU SIRE Summery)! He is a full brother to the original Sanjiro, but has now over shadowed him on many levels. To make this opportunity even more enticing, you can't find Sanjiro 3 semen and with that being said, the new owner of these exciting embryo calves can honestly say they own genetics that are rare and hard to find. Christmas might have just happened but when these calves are born, you'll be more excited than any child on Christmas day. You might even want to build a calving pen in the backyard so you don't miss the moment when the recip's water breaks. This mating is like bringing Time Magazine's man and female of the year together into one but better because they'll turn around and make even bigger waves. Don't miss out on this first of it's kind and possibly last of it's kind opportunity.

**HEIFER CALF CALVING DATE: 08/14/2018**

• Hello Lot 9! In terms of phenotype, you can't make one much better. If you end up being the proud new owner of this bull, expect your neighbors to be jealous and ask you where you found such a stout smooth shouldered Angus. That's right, this bull could compete against the best of any breed with the amount of depth, muscle and added bone that he exhibits. Lot 9 is a growthy, masculine son of the BAR R Shigeshigetani 30T and is out of one of the top donor cows at Golden Age Farm, CHR Ms Suzatani 262T, who is sired by World K's Michifuku and is a maternal granddaughter of the Suzatani cow. Not only is this bull bred for carcass merit, he has the look and performance to go along with his stellar pedigree.

• **Black**

• **Sells Open; ready to breed or flush**

• Sired by the highest growth 100% Tajima to ever leave Japan by far at 1900+ lbs, and a direct maternal line Suzutani, this Kikuyasu 400 daughter is a centerpiece of anyone's donor pen! 400 semen is getting so expensive, the only way to get calves from it now is almost wholly via costly IVF as was the case with this girl. Mr Takeda told us that this heifer's maternal sire Mitsuhikokura 149 "Is a precious gem that nobody knows about yet or uses in the US." That will change as more data starts coming in. Mitochondrial DNA is only passed from mother to daughter, and cannot be passed by sons to any of their progeny. This is why Suzutani maternal line females like this heifer are so highly prized. You can't ever get precious Suzutani mitochondrial DNA by using Sanjirou or Shigeshigetani, but this heifer will put it in every female you produce from her for many years to come. Who's ready to join the Kikuyasu 400, TF 149, and Suzutani mitochondrial DNA club all in one with this girl? Just turned 1 year old and ready to breed or flush!

• Wow! Here is a once in a lifetime opportunity to buy a direct son of legendary Kenhanafuji and a 100% Tajima World K embryo cow! The only animal in this future AI sire's pedigree that was not born in Japan is his embryo produced dam World K's Tanitsuru. The embryo used to produce her was made by World K many years ago and frozen for many years. Stop trying to play catch up with older long time breeders who have original genetics and leave them all in the dust with a pedigree like this covering your herd! As Kenhanafuji semen is so rare and expensive, the only way to get calves is via costly IVF like this bull. Now here is an opportunity to get on the front end of classic vintage genetics that may never happen again.

• This beautiful girl is sired by the one and only CHR Shigeshigetani 5, long time herd bull at Crescent Harbor, and #4 ranked marbling sire all time in the 2014 national wagyu sire summary. On the bottom she is line bred Kitaguni Jr, who is a direct son of the Japanese powerhouse Kitaguni 7/8, a 2 time all Japan Zenkyo winner, who is still highly prevalent in Japanese pedigrees today. Kitaguni Jr is one of the highest marbling fineness indexing bulls of the breed. Her maternal sire the 07K bull was a 2000+ lb herd bull for many years at Crescent Harbor Ranch and one of the most consistent sires of marbling and growth in the breed for years.

• A three in one package here! Not only do you get two females in Lot 14, the cow is also bred back. This first calving female is doing a stellar job but with the bloodlines found in her pedigree, its no surprise. Her direct sire is known for more growth and milk and is a SCD:AA. Her direct dam comes from the Crescent Harbor program and was a winner as she won her class at the 2012 National Western Stock Show. Her sire is World K's Haruki II who is a trait leader in Australia and used for his added punch of performance that he brings to the table. Don't forget, her heifer calf at side is by the SCD: AA, Yasufuku JR. Yasufuku JR is the Sire for the 2006 American National Sire Summary leader in marbling traits. If you want high quality females with all the future in the world ahead of them, this is your package!

 • Lot 18 is an exciting herd sire prospect with a pedigree blended for an optimal balance of maternal and carcass potential along with exceptional performance. The dam of Katana is Eve, a full flush sister to Genesis. At the time Eve was born she had 5 maternal brothers ranking in the top 20 for marbling in the US, and is a pairing of the elite JVP Kikushige 5298 cow with breed leading marbling offspring and the Westholme 002 bull who excels in growth rate, rib eye size and superior maternal performance. We believe Eve is one of the premier growth rate Wagyu in the breed. Katana's sire, 005 Shigefuku 13M, is an exceptional individual with great balance who produces both very fine carcass cattle and very good daughters. 13M has remarkable longevity, is now 15 ½ years old. Katana is a maternal brother to Itoshigetaka.

 • Wow! Lot 19 is a direct daughter of Bar R 42B, a CL16 free daughter of the great Bar R 46U who is known for her very high marbling line of genetics. To add even more carcass merit to this pedigree, her direct sire is Bar R-MCC Shigenami 82A. This bull not only has impressive phenotype, he also carries the bloodlines to create superb carcass genetics. His phenotype carries into his daughter featured here in Lot 15 as she too is very well balanced, straight topped and has a large square hip. The maternal line found here is very sought after as the dam, Bar R 42B, was a top seller at the Bar R production sale in 2016 for \$20,000. This donor prospect has the look and most importantly has the pedigree that makes her a very intriguing package you won't want to miss.

• A full brother to the 2017 National Western Grand Champion Purebred Bull. Here is great offering from the Fujiko line, coupled with the genetics of the Bar R Cattle Company. Lot 22 is a twenty-three month old Homozygous Polled Bull, a rarity in the Wagyu breed. He is the son of Bar R Cattle Company's Bar R 110S. Heterozygous sons of this infamous bull sold at the Bar R Cattle Company production sale for \$14,000 each. In addition to his Homozygous polled status, Lot 22 has an established DNA number and SNP profile. He is free of all recessive genes. His mother is a double bred cow from the Fujiko line. A daughter of Okutani and Haruki II was a \$50,000 embryo and the first fullblood female born in the U.S. Both sides of this pedigree spell marbling, growth and milk. Also, they spell polled- the icing on the cake. Lot 22 sells as a virgin bull and has passed a complete breeding evaluation, tric and motility test.

- SELLING ONE FLUSH TO THE BUYER'S CHOICE OF SIRE
- GUARANTEED 4 GRADE 1 EMBRYOS - CONVENTIONAL FLUSH

• Here we have the flushmate to the \$17,500 high selling bull at the Primetime International sale, MFC Michiyoshi 522C. This female is a daughter of the SCD AA - Tenderness 8, MFC Ms Itoshigefuji 2-9 who recently sold in the Muddy Flats dispersion sale for \$24,000. Her full sibling, MFC Ms Michiyoshi 519C, also sold in the Muddy Flats sale for \$11,500. Lot 24's dam brings to the table a cocktail of some of the best bloodlines the breed has to offer. Her direct sire, Michiyoshi, who is now deceased, has incredible value as he is sired by World K's Sanjirou and in the Exon 5, tested BC; a gene test for the potential for marbling in Wagyu meat while at the same time, testing AA for SCD. In short, this means his progeny's meat will be more tender, plus the fat will melt at a lower temperature than all other Wagyu bulls progeny. He is the only bull in the US that has tested for these genes with these results. His semen is limited and highly sought after and to find such an amazing daughter like this one is hard to come by. Unlike her full sibling, 519C, Lot 24 is open and ready to flush right away. Don't miss this opportunity!

- Exciting opportunity! First ever Genesis semen offered in a sale. Genesis is one of the elite offspring of JVP Kikushige 5298, a JVP Kikuyasu 400 daughter out of JVP 298. JVP Kikushige 5298 was the premier cow at Blue Rock Cattle Company. She was Gerry Pittenger's favorite cow. Up until he turned over operations to his son, Gerry turned down all offers from others to buy this cow. At the time that Genesis and Eve, full siblings sired by Westholme 002 and JVP Kikushige 5298, were created JVP Kikushige 5298 had 5 sons ranked in the top 20 in the US Sire summary for marbling, a record likely to never be exceeded as no other cow has ever had more than two sons in the top 20 for marbling. Along with marbling, JVP Kikushige 5298 transmits extraordinary growth and volume. Those who have seen Genesis and his progeny are well aware of their performance, power and volume. The new great news is that his full blood progeny are producing great carcasses.

### 5 UNITS OF SEMEN - LOCATED AT HAWKEYE BREEDERS - ADEL, IA

• **BLACK**

• In 1976 there was two black Wagyu bulls imported from Japan; Mazda and Mt Fuji. Mt Fuji originated from the Hyogo Prefecture and is heavy breeding from the Tajima line. Mt Fuji was the beginning of forming the Wagyu herd in the United States as we know it today. Semen on this bull is rare and hard to find. This is an opportunity to incorporate original blood-lines into your program!

• **BLACK**

• The first Wagyu exported from Japan to the United States was in 1976 with the importation of two Full blood Black Bulls and two Full blood Red Bulls. The two Black Bulls were Mazda and Mt. Fuji. Mazda originated from the Tottori Prefecture and Mt. Fuji originated from Hyogo Prefecture. Original genetics at their finest is here in Lot 31!

### 4 UNITS OF SEMEN - LOCATED AT ELGIN BREEDING SERVICE - ELGIN, TX

• **RED**

• **F11C**

• Judo is one of the two Red Wagyu bulls imported from Japan in 1976. He is frequently cited as a carcass improver and in several papers authored by Washington State they made him the top red Wagyu bull. Judo puts his own look on the calves he sires and has been a stalwart bull for red Wagyu breeders for years. If you've always wanted to own these genetics but couldn't find them, this is your opportunity.

**4 EMBRYOS - LOCATED AT ELGIN BREEDING SERVICE - ELGIN, TX**

• **RED**

• This is the breeding that produced the Grand Champion Red Wagyu Bull at the Houston Livestock in 2017. A Kaedemaru line bred breeding that packs on size, muscle and conformation. Having genetics like this in your herd will generate value for years to come. Umemaru is a transformative bull, he consistently adds substance to his calves and Kaedemaru #2 has yet to produce a substandard calf...breeding these two animals together has produced some stellar calves, we've kept 3 of the girls and 1 of the boy's for our private herd.

**5 UNITS OF SEMEN - LOCATED AT ELGIN BREEDING SERVICE - ELGIN, TX**

• **RED**

• One of the original bulls who puts on height length and weight to his offspring. His mother is the Governor award winning cow Dai -8 Marunami. Tamamaru placed in a virtual tie in a recent carcass evaluation study with Big Al, proving he had been underused for the purpose of carcass development. Most herds have a place for Tamamaru, whether its used with a Shigemaru, Hikari or Big Al based cows, Tam breeds well with all of the original imports.

• **BLACK**

• The female in this mating was one of the high sellers for \$15,000 at the 2016 Bar R production sale. The dam of 57T was the last importations by World K. With only four offspring registered from Nakagishi 5, it is safe to say that the bloodlines featured in this mating are a very rare opportunity. Bar R 57T is only one of two daughters of the great Nakagishi 5 alive today. With JVP Kikyasa 400 as the featured sire here, there's even more power in the blood. His semen is very sought after and hard to come by. When it is sold in public auction, it sells for over \$500 a unit. Take advantage of this opportunity as these genetics are not often available!

### 3 EMBRYOS COLLECTED THROUGH IVF - LOCATED AT BLUESTEM EMBRYO TRANSFER CENTER - CARLTON, KS

• **BLACK**

• If you are looking for a sire to make exceptional females, Kenhanafuji is the bull as he has been known to sire some of the best Fullblood females in the breed as well as sire progeny with superb marbling. His genetics are older and are becoming harder and harder to find. On the bottom side of this pedigree we have the famous Bar R 57T cow. This female was one of the high sellers at \$15,000 at the 2016 Bar R production sale. The dam of 57T was the last importations by World K. With only four offspring registered from Nakagishi 5, it is safe to say that the bloodlines featured in this mating are a very rare opportunity. Bar R 57T is only one of two daughters of the great Nakagishi 5 alive today.

• **RED**

• A fundamentally unique breeding, 1439 is Big Al by the original import Dai 8 Marunami and Samsung's breeding is Shigemaru by Haruko. 4 original imports in one package. This breeding should produce a cow that's as close to the Japanese original as can possibly be bred. Samsung produced over a 100 high quality carcasses in a recent carcass evaluation study we did and our semen customers have been excited about the calves he's sired. 1439 is the female version of the bull HeartBrand Red Emperor, historically her calves have been easy keepers.

**5 UNITS OF SEMEN - LOCATED AT ELGIN BREEDING SERVICE - ELGIN, TX**

SCD: VA TENDERNESS: 3

• **RED**

• Honjo is one of the most phenotypically impressive Akaushi bulls ever born due to his combination of flawless design, total muscularity and thickness, and maternal lineage. Genetically, he is the last living male descendant from the Legendary cow, Kaedemaru. Honjo's maternal granddam is the Japanese import Namiaki NI, that came to America in the mid 90's. Kaedemaru was her first natural born calf born in the US and is still alive today at 22 years of age. Kaedemaru created a genetic giant when mated to Red Emperor with Honjo.

• The sire featured here is highly sought after. His semen is hard to find and when sold, sells for over \$500 per unit. He is a 100% Tajima blood bull and the heaviest Tajima bull imported weighing 1980 lbs. and holds the record for the largest ribeye area. He produces top carcasses and big rib eyed cattle. He has sired some outstanding females. This sire is found in a number of top producing female bloodlines and should not be underestimated as a stud sire, especially in breeders wishing to get frame score into females with Tajima blood. When we add the AA - 10 genetics found in LMR Ms Sanjirou 4P 2406Z, we have created an amazing mating. There will be plenty of growth and most importantly, this \$12,500 valued female adds the much needed boost of carcass merit to make this mating one that any progressive breeder should include into their program.

5 EMBRYOS COLLECTED CONVENTIONALLY - LOCATED AT BUCHNER ET SERVICES - NEW AUBURN, WI

• BLACK

• Grade 1 embryos sired by original import bull Yasufuku Jr., he is a bull that has made his mark as one of the top marbling bulls of the breed and it passes on through his progeny with 78% of his offspring having graded 9+ on the Australian scale for marbling. His sire Yasufuku J930 has sired many of the top marbling bulls in Japan. Yasufuku Jr. makes some beautiful daughters who are long, tall and deep with great carcass. The dam of the embryos is a fullblood daughter of MFC Itomoritaka 0-41 who has sired class winners at the National Western Stock Show in Denver. She is a larger framed female who is long in the loin. She is a great combination of Itomoritaka, Michifuku, JVP Kikuuasu 400 and Sanjiro! She is a SCD AA and a tenderness of 7. She is free of all genetic defects. Yasufuku Jr is a CL16 carrier. Some of these original import bulls semen is getting harder to find, don't miss out on your chance to get some embryos sired by one of the best bulls to come over from Japan.

10 UNITS OF SEMEN - LOCATED AT HAWKEYE BREEDERS - ADEL, IA

SCD: VA TENDERNESS: 3

• BLACK

• Shigeshigetani has some of the most powerful genetics in the Wagyu breed. He has Yasumi Doi as well as Yasu-tanidoi bloodlines but he carries the Kumanami strain as well. The Kumanami family is known for its extremely potent marbling genes. Shigeshigetani is a half brother to the famous bull Sanjiro. Note: The World K Group reports 3800 F1s were fed 540 days ADG 2.156. 90% graded 9+ on the Australian scale, meaning 3 full grades above USDA highest grade of prime. The remaining 10% graded 7-9 on the Australian scale and this would be prime to prime + on the USDA scale.

**3 EMBRYOS - LOCATED AT BLUESTEM EMBRYO TRANSFER CENTER - CARLTON, KS**

- **BLACK**
- **FEMALE SEXED SEMEN**

• The sire featured here, CHR Shigeshigetani 5, was the highest ranking bull and #4 in marbling in the national sire summary. The semen used to make this mating was female sexed meaning you have a very strong chance of having heifer calves from this embryo package. The dam featured in this mating is a CL16 free daughter of the great Bar R 46U who is known for her very high marbling line of genetics and Bar R 42B herself was a top seller at the Bar R production sale in 2016 for \$20,000. This mating is a for sure if you are looking to make exceptional carcass genetics.
