Sale Barn	509-397-2502 & 509-397-9175

### Sale Time & Location

The auction will begin at 1 PM PST at the  
The Bar R Ranch  
1751 Halpin Road  
Pullman, WA 99163

*Please see map on back cover*

### Sale Headquarters

The HillTop Lodging, Cuisine & Spirits  
928 NW Olsen  
Pullman, WA 99163  
509-332-0928  
hilltopinn@pullman.com

*Please tell the staff that you are in town for the Bar R sale and you will receive a special rate.*

### Viewing the Offering

Cattle will be available to be viewed starting on Friday, May, 20 at the ranch through the start of the sale on May 21. If you would like to view the offering prior to the sale, please make arrangements with Jerry Reeves.

### Air Transportation

Spokane International Airport .. 1hr, 24 min to Pullman  
Lewiston Regional Airport..... 46 min to Pullman  
Pullman Regional Airport

### Food & Refreshments

A pre-sale get-together will be held Friday, May 20 throughout the late afternoon and early evening at the sale location/Bar R Ranch; please come and join us! A complimentary Wagyu lunch will be served on sale day starting at 11:45 AM.

### Supplemental Information

A supplement sheet will be available on sale day with updated information including calving and breeding dates, etc.

### Herd Health

All animals are up to date on vaccines and general herd health through the Bar R herd health management protocol.

### Brand/Vet Inspections

Both a Washington state brand inspector and licensed veterinarian will be present to facilitate in writing any brand and health papers that may be required. Some tests may need to be administered for health papers to specific regions of the country. Bar R will work with the buyers to ensure that this will take place in the event that they are required however, all additional health test expenses are the buyer's responsibility.

### Delivery

Buyer's are responsible for their own trucking, delivery arrangements & costs. Bar R will assist in housing purchases until delivery is scheduled.

### Lot Numbers

Animal ear tags will correspond with the catalog. Calves alongside cows will be referred to as "A" lots.

### Genetic Conditions

All known genetic conditions will be listed unless the animal is free of all recessive disorders.

### Terms & Conditions

All animals sell under the standard terms & conditions; all animals sell with a 100% guarantee from Bar R. Any announcements from the block on sale day take precedence over any printed material.

### Liability

All persons attending this sale and its related functions, do so at their own risk. Bar R, James Danekas & Assoc., Inc., their employees and all sale representatives assume no liability, legal or otherwise, for any accidents or injuries that may occur.

Dear Wagyu Breeders,

On behalf of Bar R Cattle Co. we welcome you to our first production sale. In 1989 we went to Japan to learn about Wagyu cattle. For 10 days we looked at cattle in almost every prefecture trying to get a good understanding of the Japanese Wagyu, the Japanese philosophy, and their management practices. The Wagyu are a national treasure of Japan and we gained enormous respect for that. We were excited to start breeding these cattle ourselves. We have been breeding Wagyu cattle for 26 years, and our first F1 calf was registered in the American Wagyu Association in 1990. Bar R Cattle Co. helped collect carcass data for the National Wagyu Sire Summary, which allowed us to make decisions on which sires and lines to use to make progress in carcass traits. We have also used data from the Australian Breed Plan for evaluating milk EBV data in trying to increase milk in our high carcass value cattle. The last 5 years we have been evaluating our bulls and some of the heifers in a GrowSafe system to select on increased performance and efficiency using average daily gain and residual feed intake data without losing carcass value. We are of the opinion that the addition of the polled gene into the Wagyu breed will be the future direction of many World Wagyu breeders outside of Japan

For this sale we have put together a set of superior cattle, both male and female, that we hope will attract the purist Wagyu enthusiast as well as the commercial cattlegrower. We are very optimistic about the Wagyu breed and excited to see how it will be incorporated into the cattle industries of different countries. It will not and should not be the same in every country, but because of these unique carcass traits, Wagyu genetics will influence the cattle industry across the world.

Best Regards,  
Jerry Reeves & Heidi Reeves and Family

*Videos of the entire offering will be available at [www.jdaonline.com](http://www.jdaonline.com)*

LiveAuctions. **TV**

Real-time bidding for this sale is available via the internet. Live audio and live video will allow registered buyers to bid on the animals just as they were present the sale day. A buyer account must be created prior to the sale. Please visit <http://www.liveauctions.tv> to create an account and request a bidder number. Instructions are available to walk you through the account set up process. If you cannot attend the sale because of weather, distance or business conflicts, please use LiveAuctions.tv. Buyers who would like to bid via internet must register with LiveAuctions.tv two days prior to the sale. If you have questions, e-mail [Brad@LiveAuctions.tv](mailto:Brad@LiveAuctions.tv) or call Katie Colyer at (208) 599-2962.

### Homozygous Polled

- Heifer Calf at side born 03/26/16 sired by BAR R 52Y • Does not sell with cow

The 5U cow is the first homozygous polled cow Bar R Cattle Co. has made available for sale. She is a cow that has flushed well for us, breeds back easily and has been a very productive cow in our herd. Her last natural bull calf Bar R Arimura 30B was homozygous polled and ½ interest sold to Southern Cattle Co. for \$30,000. Her last seven flushes averaged 5 number 1 embryos per flush. She bred back first estrus to Bar R 52Y the sire of the heifer calf at her side. Bar R 5U is Sired by Bar R 10S number 2 ranking carcass weight sire in the National Wagyu Sire Summary. Her Dam Bar R 13P is Sired by Bar R Takasuru 1K who ranks number eight in marbling tied with Bar R Shigheshigetani 30T. The Bar R 13P cow is 12 years old and still producing calves in our herd. 5U is the Dam of the two polled red bulls and one polled black bull selling as lot 35 of this sale. She is a large framed cow with straight lines, good milk production and is a very good mother, she is the prototype of the Polled Wagyu cow of the future. She sells open and ready to flush within 30 days, 2 straws of any sire in our BR2 2016 Sire Directory goes with her. The possibility to start your polled Wagyu herd with this quality of a cow is a rare opportunity which will not occur again. Her heifer calf at side will remain in the Bar R Wagyu herd.

• AI'd 12/16/15 to BAR R-MCC Shigenami 82A • Due September of 2016

Another daughter sired by Bar R 58Y, a son of Bar R Shigeshigetani 30T, the maternal grandsire is Bar R Yasufuku 42K the number 2 marbling bull in the National Wagyu Sire Summary. Both the dam of 42B and the grandsire Bar R 42K are carriers of CL16 but 42B is tested free. This makes her a very unique individual in that we do not have many animals available in this high marbling line free of defects. Her marbling pedigree EPD of .40 is the highest of any female in this sale. This is a heifer that did not make the trip to Snyder Livestock for the GrowSafe evaluation. She is confirmed pregnant to Bar R-MCC Shigenami 82A (bred 12/16/15). This heifer has the ancestral EPD data to show she can produce the next great carcass sire or dam in the Wagyu breed.

• Sells open with semen options

Bar R 18B is sired by Bar R Namikawa 63Y a son of Bar R Shigeshigetani 30T (# 8 marbling EPD). Namikawa has Bar R Takasuru 1K (#9 marbling EPD) as his maternal grandsire, these two lines of cattle are both high marbling with growth. The Dam of 18B is BR MS Itofuku 7652 a cow Bar R purchased from Blue Rock Cattle Co. (Gerry Pittenger kept 7652 for his last cow). He liked her conformation and was impressed with her sire BR Itomichi 4632 (ranked # 11 for marbling) and her grand sire, BR Itomichi 0602, for his conformation. 18B has the second highest pedigree Marbling EPD of any female in this sale as well as a high carcass weight EPD. This heifer is ready to breed or flush and sells open with 2 straws from any sire in the 2016 BR2 Wagyu Sire Directory.

• Lot 6A Heifer Calf born 03/30/16 sired by BAR R Shigeshigetani 30T

Bar R 36U was sired by Bar R Ichiro 32R a very popular sire we sold to Cattle Development Center; he had the highest number of gene stars ever recorded for any bovine at that time. The 32R bull's dam is Bar R Miss 2N a very dominant cow in our herd with the most sons (4 bulls) in BR2 Sire Directory. The dam of 36U is Bar R Yasufuku 38R a cow with Yasufuku Jr on the top side and Michifuku on the bottom side of her pedigree. Bar R 36U is a cow with a tremendous marbling pedigree with an inbreeding coefficient of 14 %. She has a heifer calf (tag D6) at her side by Bar R Shigeshigetani 30T which sells with her. This calf will have an inbreeding coefficient of 9% with tremendous carcass potential and added growth potential of the 30T genes. The cow is open ready to flush within 30days and comes with 2 straws of semen of any bull in the 2016 BR2 Wagyu Sire Directory.

• AI'd 12/25/15 to JB-BAR R Ichiro 68A • Due October of 2016

Bar R B93 is sired by Bar R Shgieshigetani 30T and her Dam is Bar R 26Z which is lot #11. B93 has the third highest REA EPD of the full blood females in this sale and her scan data show her to have a 1.52 square inch REA /100 lb body weight (2nd highest of the 2014 full blood heifers in this sale). Her marbling, Back Fat and Carcass wt EPDs are all very high. This heifer has exceptional carcass potential. She was bred 12/29/15 to JB-Bar R Ichiro 68A and confirmed pregnant.

• Lot 9A Heifer Calf born 03/20/16 sired by BAR R Shigesheetani 30T

This 9 year old cow is sired by the popular Bar R Sanjirou 4P who ranks #12 for marbling in the latest National Wagyu Sire Summary. Semen is limited on 4P and we have suspended collecting him further. This is the only 4P daughter we will sell in this sale. The maternal side of 4T involves the bulls Michifuku, Fukutsuru 068 and Kikuaysu 400 all supporting a high carcass quality female. 4T has an inbreeding coefficient of 12% indicating 12% of her genes are homozygous. She has a heifer calf (tag D1) sired by Bar R Shigesheetani 30T. Not only do you get an elite cow but an elite calf with the potential of being the top carcass female in the breed. This cow is ready to breed or flush, two straws of any semen in our 2016 Sire directory go with this cow and calf.

• Bred to Bar R B94 (a 30T son) • Due October of 2016

Bar R 51B was sired by Bar R 58Y a son of 30T which has caught our attention as a possible excellent carcass bull. Her dam has Michifuku and Fukutsuru 068 breeding which accounts for her high marbling and rib eye area EPDs. She is a large deep body heifer with a 6.3 frame score. She was bred to Bar R B94 on 1/16/16 and confirmed pregnant. Bar R B94 is a double bred Shigeshigetani grandson which is lot 41 in this sale. The calf of this mating will have a 19% coefficient of Inbreeding.

• Bred to Bar R Shigeshigetani 30T • Due the Fall of 2016

Bar R 57T's sire is Sanjiro the number 10 ranked EPD marbling number 9 ranked rib eye bull in the National Wagyu Sire Summary. This cow is full sister to the bull Bar R Nakagishiro 56T who is one of the more popular Wagyu bulls because of his extreme physical correctness. Her dam is Nakagishi 5 a cow that came in on the last importation of World K from Japan. There were only 4 offspring registered from the Nakagishi 5 cow one to World K and three to Bar R Cattle Co. The last two flushes, done by Galen Lusk DVM, of 57T in 2015 yielded 26 and 15 #1 embryos of which all sold either domestically or internationally for \$1000 each. We are making available one of the only two daughters of the Nakagishi 5 cow alive today. This is a unique opportunity to own one of two cows that have these unique genetics. 57T is bred to Bar R Shigeshigetani 30T and confirmed pregnant to calve in the Fall. Bar R 57T is a carrier of Factor 11.

The dam of 43U was a large framed cow which we used as an embryo donor cow and is also the dam for Bar R Namikawa 63Y bull which was the #1 high indexing RFI X ADG bull in our 2013 GrowSafe trial. The sire's side of 43U shows Sanjiro 4P as a grandsire and Hirashigetayasu as a greatgrand sire. This cow has tremendous growth and efficiency in her genes and will continue to produce high growing efficient offspring. She has a son in the 2016 GrowSafe trial, data will be available at the time of this sale. She was bred to JB- Bar R Ichiro 68A (12/6/15) (clean up bull 30T out 2/22/16) (confirmed pregnant) the 68A sire is Bar R Ichiro 31R (#3 marbling EPD) and grandsire Fukutsuru 068 (#1 marbling sire) this calf will have growth, efficiency and carcass quality.

This is one of our elite heifers sired by Bar R Itomoritaka 42Z, which we consider the top milk bull in our battery of bulls. The data from Australia on the sire of 42Z, Itomoritaka, shows him to be the top milk bull in the breed. We consider the B79 Dam Bar R 51P which is a large framed cow to consistently produce high growth and efficient offspring as shown by the data on Bar R B79. She had a 2.23 lb ADG and an RFI value of -3.35 which indexed her the number 1 ranked ADG X RFI heifer. She has a 6.3 frame score and we consider her the kind of maternal heifer to start a herd with. She is open and ready for spring breeding or flushing and we will supply two units of semen from any bull in our 2016 Sire directory.

• Sells open with semen options

Bar R C29 is a 1/2 brother by sister mating of Bar R Shigeshigetani 30T calves resulting in a linebred animal with an inbreeding coefficient of 18% which has resulted in the high carcass EPDs. The 18% inbreeding means that 18% of the genes in her body are homozygous and thus will translate more of the good genes to her offspring. This is again a heifer to build a herd on because of her potential to pass these great genes on to her offspring.

This yearling heifer, Bar R C45 is sired by Bar R Shigeshigetani 30T and her Dam was sired by Bar R Sanjiro 4P. The carcass value in both these sire lines will come through on C45 and can be seen by the 3rd highest marbling EPD female full blood in this sale and the 5th highest REA EPD. Again you cannot find heifers with this high of carcass EPDs in the industry. C45 if bred correctly will raise that next AI sire to be a carcass trait leader. Two straws of buyers choice from the 2016 BR2 Wagyu Sire directory are part of the sale.

**Heterozygous Polled**

• AI'd 1/15/16 to Bar R Arimura 30B • Due October of 2016

Bar R 24B is a purebred heterozygous polled Wagyu heifer confirmed pregnant to Bar R Arimura 30B (bred 1/15/16). Bar R Arimura 30B is homozygous polled so the resulting calf will be polled with a 50/50 chance of being homozygous polled. 24B's sire is Bar R 52Y (Taz) a polled bull owned in partners with Hammond Ranch of Tasmania, Australia. In 2015 they used 5000 units of semen and we shipped another 5000 units this year because they were out. This heifer has breed average Carcass EPDs and is above average for carcass wt. This trait shows in her own performance as she is the heaviest of all our heifers to come out of the GrowSafe trials at Snyder Livestock and she had the highest ADG and her ADG X RFI index was 7th. This is a heifer with tremendous growth and will have a polled calf to start the next great polled herd.

Bar R B86 is a horned purebred heifer sired by Bar R Shigeshigetani 30T (#1 REA EPD sire) and her maternal grand sire is Bar R Double Suzutani 50T (#3 REA EPD sire). Because of these two ancestors her REA EPD is 0.75, the highest of any female in this sale. This correlates with her scan data which shows a 1.71 square inch rib eye per 100 wt, again the highest of any heifer in this sale that was scanned. She is confirmed pregnant (AI'd 12/31/15) to Bar R Arimura 30B (homozygous polled bull) so she will have a polled calf. An opportunity to own an elite purebred carcass female who will produce a polled calf in the fall.

### Black Polled vs Red Polled Purebreds:

Bar R-AB 4500, 4503 and 4504 are flush brothers owned by Bar R Cattle Co. and Agri Beef. All three are heterozygous polled. 4500 is black and 4503 and 4504 are the first Tajima Red Polled bulls we have produced. These bulls can be traced back 11 generations of Wagyu breeding on some legs of the pedigree and include the four bulls imported in the mid 1970's. The last four generations involve all black bulls whose ancestors were imported in the 1990's. We believe the addition of the polled gene will be the future direction of World Wagyu breeders outside of Japan. These bulls are parent verified by DNA back two generations. They are free of the Wagyu genetic defects that we can test for. This may be your first but probably not your last opportunity to start with polled genetics either black or red. The purchase of each bull includes 50 straws of his CSS certified semen plus 25 straws of each of the two brothers. Bar R Cattle Co. and Agri Beef reserves semen rights on bulls at their expense

Bar R Namikawa 2B is the result of 1/2 brother 1/2 sister mating from a son and daughter of Bar R Shigeshigetani 30T (tied #8 marbling #1 ribeye and #1 carcass wt EPD). There is also the Bar R Takasuru 1K bull on each side of the pedigree (#9 marbling EPD). The line breeding on 2B results in an inbreeding coefficient of 24% which enhances his chances of being an extraordinary carcass bull with 24 % of his genes being homozygous from such high carcass ancestors. 2B was in a Growsafe trial at Grandview Idaho with an ADG of 3.11 lbs we did not trust the efficiency results and thus have not used them. He is a tall growth bull that has performance by his ADG and carcass quality in his pedigree. We used 2B for 30 days as a clean up bull in one of four spring breeding herds.

Bar R Namikawa 46B has a very impressive pedigree (inbreeding coefficient 5%) with 3 out of four of his great grandsires having EPD data putting them in the top 25% of marbling Wagyu bulls in the US system. Grandsires, Bar R Shigeshigetani 30T is ranked #8 in marbling, #1 in rib-eye area, #2 in BF and #1 in carcass wt while his maternal grandsire is ranked #11 in marbling and #5 in carcass wt. This pedigree with EPD values on the ancestral sires will result in both carcass value as well as performance value in 46B. Progeny data on his sire 63Y will come out later this year. The maternal grand dam Bar R 52T is considered a very unique cow with exceptional phenotypic conformation.

9B is a grandson of Shigeshigetani on the sire side with Michifuku and Sanjiro on the Dam's side of the pedigree with a 8% inbreeding coefficient. This bull was in a GrowSafe trial at Grandview but the data appears compromised so RFI data is not available but 9B had an ADG of 2.87 lb and scanned REA of 8.3 square inches at a weight of 650 lb. which was the number one REA in 18 bulls evaluated. This bull should pass forward to his progeny an excellent carcass quality with a large rib eye. This is a bull which will make a potential full blood herd sire and AI sire.

The sire of 42Z (Itomoritaka ETJ 002) has the highest milk EBV in the Australian Breed Plan, and although Itomoritaka is a CHS carrier, 42Z is free of known genetic defects. We are excited about the potential of this sire on increasing milk production in his daughters over their dams. The dam side of 42Z is the very productive Bar R 2N cow which we consider one of the most productive and influential cows in the Bar R herd. 42Z is very thick over the top and down through the hind quarters and correct in his structural confirmation. He will add milk to his daughters and thickness to his sons. We have used him for two years in natural mating in our herd. He is in a progeny test and data on his carcass performance will be out later this year.

Nakagishiro 55A was in our 2014 GrowSafe trial with 13 bulls all sired by Bar R Nakagishiro 56T. He had a 2.49 ADG and an RFI of -3.06, he ranked number 2 in our Index for RFI X ADG out of the 13 bulls. The number 1 ranked bull in this trial sold at the 2015 Mile High sale 1/2 interest for \$9000 sight unseen. We used the Bar R Nakagishiro 55A bull on one set of our spring breeding Wagyu cows in 2015. We are excited about his feed efficiency associated with his phenotypic correctness. His maternal side of the pedigree cow Bar R 70U was sired by Bar R Ichiro 32R whose sire Fukutsuru 068 is still the #1 marbling bull evaluated in the National Wagyu Sire summary. The 32R bull is also the highest ranked marbling bull by Gene Star ever recorded. The maternal side of the pedigree also shows our Bar R 2N cow along with Michifuku and Kikuyasu 400. This is the quality of bull with his excellence in performance and his carcass pedigree that will make an excellent Wagyu herd sire and AI Sire for the industry.

Heterozygous Polled

Bar R B89 is polled heterozygous son of Bar R Shigeshigetani 30T. He has exceptional carcass wt, BF and REA EPDs with an above breed average marbling EPD. He had the second highest ADG of any bull in the 2015-16 GrowSafe trial of 2.95 lbs. This bull is DNA parent verified back two generations and will make an excellent bull to bring the polled genes into your Wagyu herd.

Bar R B33 is a heterozygous polled (scurs) yearling son of Bar R 53y (Taz). His carcass EPDs are above breed average in all cases. He only has two ancestors with EPD data so that decreases his opportunity to excel in this area. He is a straight lined calf with tremendous carcass with growth potential. The yearling bull calves have not finished the GrowSafe trial at this time, however, his efficiency data will be available by sale time.

Bar R B61 is sired by Bar R Itomoritaka 42Z a bull we are using for increasing milk production in our herd, he sells in this sale as lot #39. The Dam of B61 is sired by Yasufuku Jr which we consider a top marbling Tajima line. B61 had an ADG of 2.56 lb with an RFI of -0.95 which are both excellent values and he indexed 2nd in the full blood bulls. This is a bull that has potential as an AI sire for both milk production in his daughters and carcass quality.

Bar R B60 is sired by Bar R Itomoritaka 42Z a bull we have selected for his maternal ability for milk and carcass quality. The 42Z bull will be sold in this sale. The pedigree of B60 also has Sanjirou, Michifuku and Shgeshigetani 30T which are all high carcass bulls. In the GrowSafe trail 2015 he had an ADG of 2.84 lbs and an RFI of +0.53 his ADG X RFI Index ranked him number 9 of all bulls in the trial. He also has a very good rib eye area per 100lbs body weight of 1.56. This is a bull to add milk to your cow herd as well as carcass quality.

CARCASS WT.	19.89	0.12						

Bar R C58 is a double bred Bar R Shigeshigetani 30T son out of a 30T daughter, his coefficient of inbreeding is 32%, the highest in this sale. This means 32% of his genes are homozygous and when these genes are favorable for carcass traits his progeny will produce very consistent high quality carcasses. Across the board C58 has the highest carcass EPDs of any bull in this sale. He also has the largest scanned rib eye area per 100 lb body weight of any of the yearling bulls (1.6 inch sq/100lb). The potential of this bull being a trait leader in carcass and growth is very high this is a young bull that has as much or more potential than any bull in this sale. His Dam Bar R 72Y is a very productive, correct and stylish cow that stands out in our herd. (Bar R reserves the right to collect semen on C58 at our expense)

Bar R B88 is a 3/4 percentage Wagyu bull. We bred this bull to put on 1/2 blood heifers to make a 5/8 x 3/8 cross but have decided we didn't have enough cows to make this classical cross which has been used in the beef industry to make crosses like the Brangus. This percentage bull will help a commercial producer who is retaining ownership of the calves get higher carcass quality on the grid. The resulting calves would be 3/8 Wagyu and would have increased carcass value on the grid and would still have the growth of the base herd. B88 has very good carcass EPDs a very good scan rib eye area of 1.62 square inches per 100lb body wt. He is a thick bodied bull and will add carcass value in your commercial calves.

Bar R B78 is a full blood son of Bar R Shigeshigetani 30T and is a Factor 11 carrier. B78 has very impressive EPDs for all the carcass traits. This is a bull for the commercial cattlemen who are raising terminal Wagyu cross calves, the Factor 11 will have no effect in these terminal animals. The F1 calves from this bull will be in demand by commercial feedlot operators who feed out F1 Wagyu cattle.

Bar R B102 is a son of Bar R Shigheshigetani 30T with a dam sired by Bar R Nakagishiro 56T. The combination of these genetics has made a very impressive looking bull with a straight top line and thickness throughout. His BF, REA and carcass wt. EPDs are very high and his marbling EPD is at breed average. He had an ADG of 2.58 lbs and a RFI -0.64 and his ADG X RFI Index ranked him 7th out of the 20 bulls evaluated. This is a bull that will help any commercial herd that is raising F1 calves.

CARCASS WT.	13.72	0.08						

Bar R C31 is a yearling purebred son of Bar R Namikawa 63Y out of a granddaughter of Ito-zurudoi. From C31's pedigree we would expect a large framed bull and sure enough his frame score of 6.3 is the highest of the 25 bulls in this feed trial. His carcass EPDs are all well above breed average. This bull will work for the commercial cattlegerson producing F1 calves out of mature cows.

RIB EYE AREA	0.29	0.04	ADG-RFI INDEX	98.4	INDEX RANK	3	% IMF	3.41
CARCASS WT.	1.38	0.05						

If Bar R C43 would have been free of F11 he would have started this sale but he wasn't, this is the second homozygous smooth polled bull Bar R Cattle Co. has produced in 26 years of breeding Wagyu. He is above average on all carcass EPDs and has a 1.5 square inch scanned rib eye area per 100 lb body wt. He has a 5.3 frame score, ADG of 4.32 lbs the highest of the "C" bulls and is phenotypically very correct and docile. In the correct situation this is a bull that could be used in the AI industry for terminal cross cattle and at the same time select offspring without the F11 gene to go on to the next generation.
