## SCHACHER AUCTION SERVICES

Robert Schacher 817-219-0102  
PO Box 33804, Fort Worth, Texas 76162  
rob@schacherauction.com • www.schacherauction.com

Welcome Friends and Cattle Producers,

For the ninth consecutive year the Texas Wagyu Association is proud to present to you the Steaks are High annual production sale, and I am grateful for their confidence in me to act as their Sale Manager.

Each year the Wagyu breeders that make up this event have gone out of their way to improve the quality of the offering, and as you look through this catalog, I think you will agree that this is the best set of cattle and genetics we have had.

This year we are excited about the new method we are using to merchandise our frozen genetics packages. Beginning on April 16 those lots will be available to bid on using SmartAuctions in a timed internet auction that will close on the evening of April 20 during the Wagyu Social. The live auction on Saturday, April 21 will feature 98 lots of live cattle.

The Texas Wagyu Association is one of the nation's leaders in breed improvement, and they are striving to help get data reported on registered cattle. The TWA Elite Wagyu Performance Test is a Grow Safe feedlot gain test at PX Feeders in Evant, Texas, and many of the cattle that were in that test are featured in this sale. Those cattle are marked and all of the data collected on them is included.

If you have any questions, please do not hesitate to contact us. Thank you for your interest in our sale.

Sincerely,

*Robert Schacher*  
Robert Schacher

**The Texas Wagyu Association is proud to host speakers at the  
Texas Wagyu Association General Meeting Friday, April 20, following a Wagyu Burger  
Lunch at 12:00 NOON. Speakers at 1:00 PM. Meeting at 4:00 PM.**

*Presentations include: Understanding EPDs and Gain Testing, Beef Supply Chain Panel and the TWA Carcass Competition.*

**Please join us for our Friday Night Fun Auction and Cowboy Social 5:00 PM**

**For the complete schedule of events, see page 58.**

**Tenroc Ranch is located at 5471 Thomas Arnold Road, Salado, Texas.**

*From the North:* (Dallas-Fort Worth) take exit 284 off of I-35 and go south on service road to Thomas Arnold Road, go two mile West on Thomas Arnold Rd to Tenroc Ranch on your left.

*From the South:* (Austin) take exit 283 off of I-35 and go to the service road on the West side of the interstate. Take the service road north to Thomas Arnold Road and go west two miles to Tenroc Ranch on your left.

## **LIVESTOCK MORTALITY INSURANCE:**

Livestock Mortality and Theft Insurance is available through StarNet Insurance Company, Robert Schacher, Agent 1859190.

## **ANNOUNCEMENTS:**

All announcements from the auction block will take precedence over any printed material

## **LIABILITY:**

All persons attending the sale and related functions do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The owners and hosts assume no liability for loss or damages however so caused.

## **HAULING:**

Clay Emmons, Fairfield

254-716-5735

## **TERMS:**

The terms of the sale are cash or bankable check unless arrangements are made prior to the sale. Satisfactory settlement must be made with the clerk of the sale immediately after the close of the sale. Only when the above conditions are met will the buyer be able to load cattle. In no case will animals be released unless settlement is made with the clerk of the sale.

All transactions that include Semen, embryos and flushes are between the buyer and seller. All shipping costs are the buyer's responsibility and at the buyer's expense. Schacher Auction Services will hold proceeds to the sellers of these lots in Escrow until the buyer has taken delivery. Unless otherwise stated there are no guarantees of conception of embryos. Neither Schacher Auction Services nor Members of the Texas Wagyu Association Board of directors (with the exception of board members that are also consignors) will be responsible for storing or delivering embryos or semen.

## **ERRORS:**

The material in this catalog has been carefully edited. If errors or omissions are discovered, they will be announced. Such announcements take precedence over the printed matter in this catalog. Neither the editors of the catalog, the Texas Wagyu Association, the sale management, nor the consignors can assume any responsibility for errors or omissions in the catalog.

## **RESPONSIBILITY:**

The consignor will represent and be responsible for his animals. In no case, however, will the consignor be responsible for any damages beyond the selling price of the animals. The Texas Wagyu Association and the sale manager assumes no responsibility, no warranties and no guarantees on the cattle presented in this sale. All transactions are between the buyer and seller.

## **INTERNET BIDDING:**

This auction will be broadcast live at [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Anybody wishing to bid online must sign-up prior to the auction.

SCD: TEND:

1A Bull Calf JC Yasushige 284 (U32632) born 2/2/18 sired By JC YASUTANI 068 (FB10098). Outstanding donor prospect. Rare foundation mating (Shigefuku x Haruki 2) gives this 1st calf heifer special value, with a powerful combination of milk, marbling, & growth. Uncommonly high Kedaka pedigree is a perfect match for Tajima sires. Dam is full sister to high selling female in 2014 TX Sale and goes back to Itohana 2 and Hikohura (high marbling & growth). Sire is highly ranked for frame, milk, and fertility. Sells with bull calf at side, described below. Open & ready for her 2nd ever flush. BW 57#: WW 465

There are very few descendants of Yasutanisakura who are free of the disorders and I think this fact gives this lot extra value. The calf's sire's semen sold for \$400 in last year's sale, which was a high price for a son of a foundation bull.

Bull calf at side is free of all known genetic disorders by pedigree. Potential herd sire. His sire has track record of high marbling for Winter Family Beef program & he is only known progeny of Yasutanisakura who has tested free of all 4 genetic disorders. Breeding to this foundation bull ceased in 2010 when it became known that he carried 3 of the 4 disorders. BW 53#.

*AI Bred 11/10/17 to SHIGEMARU (FB2124), PE 11/20/17 - 2/1/18 to NEAL SHIGEFUKU 12D (FB25633)*

We purchased 1065 in The Denver Sale in 2017 where she was the high selling female at \$12,000. She is a Big AI Daughter out of a Hikari sired mother with Judo and JVP Homare in the background. This red female has it all. SOR Big AI is a double Dia10 line bred bull with some of the best 1994 genetics tied back to a high marbling 1976 bull merged together. Huge potential here. She is phenotypically beautiful with an extremely long body and feminine front end combined with a powerful muscle shape and plenty of bone. A full brother to 1065 sold in the 2017 Steaks are High Sale and is now a feature herd Sire for WagyuRanch.com.

## THE STEAKS ARE HIGH *open heifers*

These full blood Red Wagyu calves were born Spring 2017 on Big Life Farm. The sire, ROA Red Galaxy, is the full brother to the top selling female at the 2012 TWA sale (\$44,000.) and was Grand Champion overall bull at Houston Stock Show. He is moderately framed with both depth and thickness for exceptional carcass quality. He brings volume, muscle, and milk with his genetics from Hilari and Shigemaru. MS Rueshaw 75Z, the dam, is large framed and has a great temperament. These calves represent the best growth and highest marbling genetics in the red Wagyu breed. 5% inbreed coefficient.

Big Life Farms is dedicated to providing top quality breeding stock for the growing Wagyu industry and pride ourselves in selecting embryos with exceptional genetics for transfer to our recipient cows. All of our animals are afforded a low stress, nourishing environment in which to grow and thrive.

## THE STEAKS ARE HIGH *open heifers*

These 2-year-old heifers are ready to breed. These full blood Red Wagyu calves, from embryos produced by Bald Ridge Wagyu, were born Spring 2016 here on the Big Life Farm. Sire Bald Ridge Henshin is large framed, easy going and one of the best bulls among his contemporaries with exceptional EDP's; lots of growth and great breedplan figures. He is in the top 5% of the Australian breed plan for 200 and 600-day weight and top 10% for the 400-day weight. His bloodlines trace back to Kaijikari, Hikari and Big Al, are packed with the breeds best red genetics. Dam Tamayuko G0009 is a nice female, very correct and one of the biggest framed cows in the Bald Ridge program.

These heifers have huge all-around potential. Inbreed Coefficient 11%

A young heifer that measured Prime (8.08) via ultrasound with only 4mm of back fat and a rib eye of 13.58 square inches at only 18 months of age. This heifer has length, volume and capacity to make a great cow. The pedigree for this heifer is one for high marbling with a high percentage of the Tajima line. Her bloodlines include Shigeshigetani, Michifuku, Suzutani, Haruki 2, and Fukutsuru from the Sire side. Shigeshigetani has some of the most powerful genetics in the Wagyu breed and carries the Kumanami strain. The Kumanami family is known for its extremely potent marbling genes. This heifer has Yasufuku Jr., JVP Kikuyasu-400 and Michifuku from the dam side. Yasufuku Jr is also known for marbling and Kikuyasu-400 has the reputation for adding size and quality of the carcass. If you are looking for a cow that will add marbling and can be the cornerstone for your herd then this is your female. She sells open and ready to flush or AI.

*Sells Open* Provides a great combination of powerful genetics from foundation Wagyu genetics. This young heifer is sired by MCH Sweet Willie A021 who was the 2015 and 2016 Grand Champion Fullblood bull from the National Western Stock Show. This sire has been used to add size and growth in the Wagyu breed without reducing marbling and Sweet Willie carries on the Dai Ni Kinto line that is known for producing consistently large animals that yield high quality beef. On the dam side, we have foundation genetics from WKS Yasufuku Jr, WKS Michifuku, and TF Kikuhana. In the 2017 LMCC Sire Performance Study, Yasufuku Jr. is the highest ranked dam sire for both IMF's %, with an average 33.96% based on 30 actual carcass images, and Marbling Fineness (32.48). In addition, Yasufuku Jr. is the highest ranked sire for IMF (33.34% based on 35 carcasses). Yasufuku is son of Yasufuku J930 who is sired three of the top marbling bulls in Japan and sired one champion and grandsired two more champions in the 9th Zenkyo 2007 All Japan Wagyu competition. This heifer has tested free of all known Wagyu genetic defects. Her SCD results and his Tenderness score will be available before the sale.

LRX MS Red Star 0819E-29E is red/black heifer out of the Chisholm Cattle Company breeding program and provides powerful combination of foundation genetics of both red and black Wagyu.

The red heifer is sired by JC Okami 132 which is a powerful combination of the Heart Red Brand Emperor and Kalanga Tamahomare. Red Emperor is the progeny of the Heart Brand Big Al and DAI 8 Marunami. He is the only Akaushi bull which closely ties the two most famous Akaushi maternal lines of DIA 8 Marunami and Akiko while also find in his heritage the venerable DAI 10 Mitsumaru.

On the dam side, we have red genetics from the sire Kalanga Red Star who as a sire has EBV's that outperformed his own sire Heart Brand Red Star and his grand sire the great Shigemaru. He also brings size, with milk in his females along with added meat production in growth weights. On black genetics contain foundation genetics from WSK Sanjiro and JVP Kikuyasu 400. This heifer has been tested free for all known Wagyu genetic defects.

BW 59, Adj. 205 day weight of 503 lbs. Ultrasound IMF of 5.42 on 1/12/2017 and REA of 1.31 on 1/12/2017. He tested the perfect 10 for tenderness with a VV score for SCD. Holy cow!!!! M6 Shingeshigetani 5173C is a powerful and attractive bull with the largest REA in his contemporary group. He also has a stacked pedigree for marbling muscle, and performance. His sire, Bar R Shingeshigetani 30T is a well documented proven herd sire for REA, CWT, BF, marbling and performance. Jerry Reeves of Bar R says 30T is the best bull he has bred in 27 years. On 5173's dam side you will find a cow who is line bred Michifuku who is "gold standard" for fine textured marbling. No doubt 5173C will breed extra muscle and performance with great marbling. He will also be fun to look at in your pasture because he is a powerhouse with outstanding conformation.

BW, 53, Adj. 205 day weight of 542 lbs. Ultrasound IMF of 5.79 and REA of 12.7 on 1/12/2017. He tested 8 for tenderness and VA for SCD. M6 Shigeshigetani 5162 is a high marbling, high tenderness, high performance herd sire who is very well made and has calving ease credentials. In fact we used him in the very disciplined M6 breeding plan last year. He is sired by Bar R Shigeshigetani 30T who proved to be #1 for REA and CWT, #2 for back fat and #8 for marbling in the 2014 Wagyu Sire Summary. On 5162's dam side you will find attractive, well balanced cow with a nice udder. Her sire, Bar R Takasuru 1 K was tied #8 in marbling and was #4 for CWT in the 2014 Wagyu Sire Summary. 5162 is a balance for marbling, tenderness, performance, phenotype and had real herd sire credentials.

SCD: AA TEND: 10

LRX Nakagishiro 56T 0429E 19E provides a great combination of powerful genetics from great Wagyu genetics. This bull is sired by Kikumichi who has foundation genetics from JVP Kikuyasu and WKS Michifuku, which could be one of the best bulls to ever leave Japan.

On the dam side, we have genetics from Bar R Nakagishiro 56T who is extraordinary in his structure and exceptional phenotype style and size. At the Muddy Flats sale in October 2017, demand for 56T genetics was robust and resulted in \$20,000 for a 56T sire bull. His daughters also commanded top demand at this sale with two heifers going for \$10,000 and \$13,500. This is an excellent bull got terminal meat production with strong marbling genetics from all sides.

This bull has been tested free of all known Wagyu genetic defects. Now for the bonus, this bull has a SCD result of AA (only 18% achieve AA) with an impressive Tenderness score of a rare 10, a score which only 2% of Wagyu population achieve.

SCD: TEND:

This young bull measured High Choice (7.55) and a rib eye of 14.08 square inches via ultrasound. These are very high scores for a bull. He has a big, wide top and a big rib cage with a large amount of volume and capacity. A pedigree with a "who's who" from the Tajima line on the sire side. This includes Shigeshigetani, Michifuku, Suzutani, Haruki 2 and Fukutsuru. Shigeshigetani has some of the most powerful genetics in the Wagyu breed blended together in one very impressive pedigree. He is half-brother to the famous bull SANJIROU. 90% of WORLD K'S Shigeshigetani's progeny have graded a 9+ on the Australian scale, meaning 3 full grades above USDA highest grade of prime. The remaining 10% graded 7-9 on the Australian scale and this would be prime to prime + on the USDA scale. On the Dam side is TF Itomichi 1/2, Takazakura and Fukutsuru. TF Itomichi 1/2 genetics are widely used for producing consistently large quality carcasses, increased milking abilities, mature size and growth rate without reducing marbling. If you want to increase the marbling in your herd, don't miss this opportunity on this great bull.

**SCD:** **TEND:**

This is a double bred Hirashigetayasu 001 female that offers additional SIZE and SCALE with correct structural design. The Japanese and Australians are both selecting for more pounds of retail yield and have graduated from small frail Wagyu some time ago. When Dr. Cooper found 23D at Salado 2017 sale he knew this was the breeding piece for the future. The breed outlying female is considered an ideal Wagyu female by many astute professionals that have seen her in person. The winning bidder gets the opportunity to top cross this beauty with the sire of their choice. All flushing costs, freezing, semen and transfer costs are the responsibility of the buyer. Seller will provide transportation to embryo's center at buyer's convenience not to go beyond October 2018. Buyer is guaranteed 6 transferable embryos. Flush will take place at Stroud Veterinarian Embryo Service or TransOva, Texas.

### TERMS OF THE FLUSH - LOTS 201-203

Buyer will have the right to flush the donor cow using semen from a sire chosen by Buyer. Buyer will receive all of the embryos produced from the flush. If less than eight (8) embryos are produced from the flush, Seller will refund Buyer a pro-rata portion of the purchase price of the flush. Seller will pay all costs related to setting up the donor cow for the flush, and will pay for the flush. Buyer will be responsible for supplying the semen for the flush. All of these donor cows have been tested free of the known recessive genetic disorders. These donor cows are open and ready to be flushed, and the purchased flush must be performed at Agrimark Genetic Services in Kingsbury, Texas and must be performed no later than 6/30/2018

### LOTS 203-205 - SIRE BY SHIGESHIGETANI

Inbreeding Coefficient 2%. Shigeshigetani represents a very powerful strain of Wagyu breed. An outstanding bull with some of the most powerful genetics in the Wagyu breed. Shigeshigetani carries the Kumanamni strain which is known for very powerful marbling ability. He is also half-brother to the famous Michifuku bull. He is 75% Tajima but still is known to produce offspring's that are tall with a long body. He is 13% Kedeka and the remaining Hiroshima and other, giving genetics that pass high on marbling, low birth weights, and just enough percentage to have milking ability as well. His semen is extremely hard to find for sale and is high value if even found. His Dam Suzutani FB1617, is recognized as one of the "TOP" brood cows in the Wagyu breed, being the Dam of the Great Sanjirou FB2501 as well as Suzutani genetics. Shigeshigetani is half-brother with Sanjirou, but more closely bred than most, Suzutani is mother to both. Shigeshigetani Sire is Haruki 2, FB1614 and half-brother of Michifuku FB1615, and both were sired by the same bull, Monjirou 11550, FB201.

This donor is sired by the immortal Itozuru Doi 151 (Considered by many the greatest composite growth x marbling bull, and only bull Takeda ever had cloned!), Takazakara (The ultimate trait magnifier) and Suzutani (undisputed "Queen of the Breed") all in the same pedigree! Of all the bulls Takeda brought in, only 1 was ever cloned, and he was cloned TWICE: Itozuru Doi 151. Itozuru Doi 151 is widely considered the greatest all around composite bull of the breed and his original straws have sold for over \$15,000 each. Suzutani is hands down considered the greatest wagyu cow to ever leave Japan as Sanjiro and Shigesigetani's dam. Takazakara is considered perhaps the best maternal sire by many top breeders because of his marbling, growth and milk. Crossing 325 with "400" the largest 100% Tajima ever imported from Japan weighing nearly 2000 lbs, magnifies the growth and marbling magnificently expressed phenotypically in 325. This cross gives you a pure Doi blood sire (Doi blood is what made Kobe beef in Hyogo, Japan famous) with a composite dam sired by the greatest composite sire, and out of Suzutaka 2, the daughter of the greatest cow in the breed period, Suzutani.

**SCD:**                      **TEND:**

This donor is too good to be true. Most breeders say she is the deepest chested, thickest, longest Wagyu cow they have ever seen when they see her. They kept getting so many repeat requests at TransOva to see her, that they put her in her own pasture paddock close to the office to save time showing her. An IVF vet at TransOva said that Nanashi is the "biggest, thickest, nicest looking wagyu cow they have ever seen there," and they "didn't know wagyu cows could look like that." What is even more jaw dropping than her phenotype is the fact she is sired by arguably the greatest composite bull of all time, with Sanjirou and Kitaguni Jr as 2nd and 3rd sires. 60%+ Tajima cows just are not supposed to look anything like this! She is a definite breed-changing superfreak. Combining Nanashi with the highest selling wagyu bull of all time "Kenhanafuji," arguably the greatest bull to ever leave Japan, as evidenced by the Japanese paying \$150,000 for him AFTER he arrived in America, will produce breed changing sires and donors

**SCD: TEND:**

TF 148 Itoshigenami is regarded as one of the best animals imported from Japan. In Australian reports as well as the Lone Mountain 2017 Sire Performance Study, he comes in among the top ten bulls (usually within top 5) for IMF,USDA grade and marble fineness. To put it simply, this bull is a great choice for siring animals for meat quality.

Rowe MS Haruki has the following animals in her pedigree: Monjiro, Haruki 2, Michifuku, Sanjiro, Suzutani, Fukutsuru 068 and Kitaguni. The embryos produced by this mating should be high quality meat animals. She has also been gene tested by Zoetis for horned/poled and has been declared indeterminate. She has scurs, but no horns. COI 1%.

TF 148 Itoshigenami is an F11 carrier and carrier free of all others. Dam is free.

Maverick is sired by Itoshigenami TF148 (FB3682) and his dam is Otanashii (FB4458). When he was six years old he weighed 1610 lbs. He is very gentle, well-mannered bull. Itoshigenami TF148 is considered to be one of the top three bulls exported from Japan according to David Blackmore, renowned Australian Wagyu producer. Itoshigenami is a medium frame bull at 1,650 pounds with excellent confirmation. His offspring's exhibit an excellent balance in all traits, both for quality beef production and cattle production. Producing carcasses of the highest quality, characterized by an abundance of very fine marbling, extremely soft fat with a low temperature melting point. He has sired roughly 370 Registered Fullblood offspring's, unknown on progeny used for beef production.

The one and only legendary KENHANAFUJI! His sire Itohana was the only zero Tajima Fujiyoshi sire to ever lead Japan in marbling and he did it two years in a row! His daughters milk like Shimanese and marble better than most Tajimas! And did we mention he is one of the rarest bulls with scarcest in the breed? Kenhanafuji is an almost identical cross to the great two time wagyu olympics winner in Japan: Kitaguni 7/8! Kenhanafuji also has the unique distinction of being THE High selling wagyu bull of all time! The Japanese bought him for \$150,000 AFTER he got off the plane in America! What do the Japanese know that you don't?

**SCD: VA** **TEND: 7**

The AWA begin testing for recessive genetic disorders in 2010 when it was discovered that the foundation bull JVP Yasutanisakura carried 3 of the 4 disorders, his valuable blood line hit a wall. There are currently 99 registered progeny and only one who is free of all of the disorders. This is the one!! Having another carrier, foundation sire as his maternal grandsire, Fukutsuru 068, it's a miracle that this bull is disorder free. Since, as he is known, was entered in the 2010 Texas Bull Test where he ranked in the top 17% for average daily gain and ribeye area, with above average marbling. In limited fullblood production his average birthweight is 58 pounds. His pedigree is approximately 55% Tajima, 30% Itozakura, \_\_\_% Shimane and 15% other for a balance of marbling, growth and milk. This semen presents a unique opportunity to widen your genetic base with no risk of disorder affected calves.

One of the most successful fullblood Wagyu bulls to come along to the Wagyu breed in the US. The LMCC Sire Summary completed in April 2017 yielded the discovery of this game changing bull. LMR Koichi 1409Y's average IMF% of harvested progeny is 33.25% ranking him #2 overall. He also topped the Sires ranked by USDA Grade in this sire summary with a score of 400. He has a marble fineness ranking of 31.56, ranking him #2. There is not another FB Wagyu sire that finished in the top or nearly top position in so many separate categories in the sire summary report. To top this off, LMR Koichi possessed a SCD profile of AA and a Tenderness score of 9, with a low coefficient inbreeding index percentage if 2.17. Additionally 1409Y is free of all genetic recessive disorders by parentage. LMR Koichi 1409Y deceased in the summer of 2017 leaving a very limited number to straws available.

Dai 6 Seizanatani is sired by the only Westholme 006 son in North America, the great Dai 6 Kitaseki. Kitaseki's outcross package is increased by his Youhou line dam. The Youhou line of Tottori is different from the Kedaka sub strain of Tottori in that Youhou line Tottoris do not have the actual bull "Kedaka" anywhere in their pedigree. The 1976 original import bull Mazda is the only other Youhou line Tottori bull breeders outside Japan have. Dai 6 Seizanatani combines the killer potent outcross combo of Westholme 006 and Youhou blood with the double whammy combo classic of the greatest Tajima cow of the breed Suzutani along with the best of Fujiyoshi blood in Kenhanafuji, Itohana's best marbling son. Don't forget that Itohana, a pure Fujiyoshi, was the #1 ranked marbling bull in Japan 2 years in a row, beating out all the high Tajima Doi blood bulls of Hyogo. Tired of getting bred more and more into a corner? Use Dai 6 Seizanatani 53B to inject a shot of real heterosis into your herd, while still line breeding the classic Suzutani, Haruki II/Monjiro and Itohana lines. Dai 6 Seizanatani is currently being worldwide CSS export eligible collected at Interglobe Genetics in Pontiac, IL.

RARE GRANDSON OF SANJIRO 3, NEW #1 MARBLING SIRE ALL TIME!  
Hanasolo 64C is a combination of the best of Shimane and Tajima blood! The new WSU sire summary updates came out and there is finally a bull that out-marbled JVP Fukutsuru 068 named Sanjiro 3, a full brother to Sanjiro. Sanjiro 3 was slaughtered after limited semen was collected so there is very small genetic footprint of his in existence. This Hanasolo 64C bull is a rare grandson of Sanjiro 3! His dam is linebred Suzutani, and his sire LMR Toshiro, is by original import sire Kikuhana, the largest wagyu bull ever exported at 2700+ lbs bred to the legendary original import cow Reiko, a direct daughter of 2 time All Japan Zenkyo winner Kitaguni 7/8. Reiko also has Monjiro and Itozuru Doi 151's sire Itokitatsuru (FB678) up close in her pedigree making her an elite combination of growth and marbling. HANASOLO 64C's sire Toshiro, a 1900 lb mainstay at one of the top wagyu beef programs in North America, is one of the very few bulls at the Lone Mountain herd that increases growth, milk, and marbling. Looking to get the increased growth, milk and marbling of high quality Shimane combined with the most potent Tajima and Shimane/Kedaka marbling genes in the breed with new #1 marbling sire all time Sanjiro 3, Suzutani and Kenhanafuji? Hanasolo 64C is the answer!

SCD: TEND:

Itozakahana 52B sired by the great Shimane powerhouse growth bull Itomichi 1/2, is a paternal half-brother to 3 time Denver Grand Champion bull Sweet Willie. His momma Mizukura 17W is a top Takazakara daughter of Six Buck Ranch's pride and joy donor Kobe Mizutani, who is herself by Kenhanafuji and a full sister of Shigesigetani!  
Breeders often forget that Takazakara is a grandson of the great original kobe beef-makin' rockstar Yasufuku 930. Adding Yasufuku blood to Kenhanafuji and a full sister to Shigesigetani on the bottom will be amplified by the extreme growth of Itomichi 1/2 giving Itozakahana 52B the ability to explode growth, milk, and marbling without reducing eye appeal. He is currently being collected for the next several years at Interglobe Genetics in Pontiac, IL.

What do you get when you combine the two greatest Shimane line original import bulls Itomichi 1/2 and Kenhanafuji with the undisputed greatest cow of the breed, a Nami line 100% Tajima known worldwide as "Suzutani" in a pedigree? The answer: Tsunami 51B and Tsunami 54B! Pay attention to the fact that the 2nd dam of this masterpiece pedigree named "Heatherkura" by Haruki II is a full sister to the immortal Shigesigetani, a bull widely considered the greatest carcass bull outside Japan. Kenhanafuji, the highest selling wagyu bull of all time, is a direct son of Itohana, one of the only 100% Fujiyoshi sires to ever lead Japan in marbling two years in a row beating out all the fabled Yasutani doi and Nami line Tajimas of Hyogo. Itomichi 1/2 is the sire of legendary meat-wagon 3 time Denver Grand Champion bull Sweet Willie, and adds thickness, growth and milk like few bulls in the breed can. Add it all up and you have a powerhouse cocktail of growth, milk and Shimane x Nami marbling all in one package. Tsunami 51B and Tsunami 54B were the highest growth yearlings out of a peer group of 15+ bulls. They both looked so good we couldn't decide which one to keep so we sent them both to EU & CSS quarantine so the whole world can bring this kind of top shelf Shimane x Nami firepower to their herds. As of this writing they are both 1700+ lb two year olds still being collected at Interglobe Genetics in Pontiac, IL.

This high Tajima calf KIKUYASU 10X came out of nowhere to be the highest frame and growth weanling out of a group of 7 embryo bull calves. All 6 of the other bull calves were sired by the only 100% Kedaka sire to ever leave Japan, Shigefuku J1822 and yet this high Tajima Kikuyasu 400 son outgrew all the Kedakas! The "10X" in his name comes from the fact that of all the calves in the pasture from his embryo group, the highest growth yearling just happened to have as his ear tag number the perfect number "10!" KIKUYASU 10X's sire Kikuyasu 400 is the largest 100% Tajima sire to ever leave Japan at just under a ton...freakish growth for a 100% Doi blood Tajima from Hyogo! Kikuyasu 10X's dam the J84 cow, is the prized donor of Will Neal's program in central Missouri after he picked her out from over 200 fullblood heifers out of Ultimate Kobe Beef's 2009 calf crop. Her breathtaking deep, broody phenotype and high power pedigree feature the great perennial powerhouse herdbull of the JVP program "JVP Oliver," and the great Strube Ranch and Ultimate Kobe Beef "UKB" herd sire "Genjiro Jr 156E" who's dam is a Westholme donor that was a full sister to the donor dam of legendary industry AI sire Shigefuku 13M. The 48F cow on the bottom of KIKUYASU 10X's pedigree was a standout donor at Ultimate Kobe Beef and mother of their great herdbull "148F Kitaseki." High Tajima with high growth at its finest right here! KIKUYASU 10X is currently being worldwide CSS collected for the next several years at Interglobe Genetics in Pontiac, IL.

A perfectly balanced bull. Lot 312 is out of MFC's favorite herd sires. MFC Itomoritaka 0-41, who's progeny are always the best of calf crop. Lot 312's MGS is JVP Yasutanisakura 931, who is a carrier of three Recessive Genetic Disorders. Here is your opportunity to own a free Grandson of JVP Yasutanisakura 931. Lot 312 brings those valuable genetics to you in a clean package.

Tajimax is the largest full blood wagyu we have seen anywhere period, and may be the largest framed high Tajima (63%) bull in the world outside Japan! If anyone out there has a higher growth performing 63% Tajima, please send us semen ordering info! Every wagyu breeder who has seen him in person to date says he is BY FAR the largest full blood wagyu they have ever seen. It is by sheer luck and coincidence that he happens to be high Tajima as well...  
A true freak of nature weighing 2000+ lbs at two and a half years old, this bull is the final answer to the ancient wagyu breeder's quest to somehow find a way to increase frame and growth without losing Tajima percentage. Use Tajimax to revolutionize the frame & growth curve trajectory of your herd WITHOUT SACRIFICING TAJIMA PERCENTAGE! Now we have a way to straighten out all those shorter, smaller framed, 800 to 1100 lb high Tajima cows in our herds to get those super fancy, thick boned heifer calves that grow up into 1400+lb fullblood mama cows. Tajimax calves average 70+ lbs and are significantly larger than any other bull we have ever used. The increased calf size notwithstanding, even a 900 lb fullblood wagyu cow owned by ReserveCattleCompany.com calved out one of his long legged, long spined, 80 lb calves without any problems. Gettin' tired of the fugly black jersey look in your fullblood herd? Tajimax is the antidote!

Here we have a carrier free son of one of the rarest wagyu sires in the world! Even Australia hasn't had a Mazda son or daughter hit the ground in over two decades and now here we have one out of a flushmate to the powerful AI sire Ichiro! Mazda was a gift by the emperor of Japan to the governor of Hawaii in the 70's and he is the only 100% Tottori bull to ever leave Japan. The only true and total outcross to virtually all wagyu herds worldwide loaded with the awesome frame, thickness and maternals of old school Eikou Tottori blood from the lowlands! Former president of the AWA Kenneth Briggs raised many Mazda carcasses over the years back in the day and said "Mazda is one of the best marbling of all the import bulls." TOTTORI SPECIAL's maternal sire Itozuru Doi 151 is widely considered the greatest all around bull with the most valuable semen of all time. Suzutaka 2 is a full sister to Shikikan, one of the top marbling bulls in Australia. "TOTTORI SPECIAL" is loaded with power on top of power on top of power in a carrier free package! Add some real Tottori heterosis and potent brand name marbling, growth and maternal genetics to your herd!  
\*WARNING: WR TOTTORI SPECIAL E124's dam is a FLUSHMATE to a Synergy Sale high selling \$52,000 cow Suzito 3 !!! USE WITH CAUTION!!!

How many of us have ever thought about how nice it would be to have the growth, milk, eye appeal and grass-marbling ability of Akaushi combined with the extreme marbling of the best Tajima/Shimane black wagyu genetics? Well, here ya go!

Umezuru Doi 58B is the result of breeding the only line bred Dai 10 Mitsumaru son "Umemaru," to one of the largest framed high Tajima cows in the world outside Japan: "Nanashi." Dai 10 Mitsumaru was considered the standout greatest Akaushi sire in the world in a league of his own when the main red wagyu shipments were imported to the USA in 1994. Umezuru Doi's dam Nanashi weighed 1542 lbs the day after traveling 27 hours non-stop in August in the back of a trailer from TransOva, Iowa to our ranch in upstate New York. She is by far the largest framed, highest growth >60% Tajima cow we have ever seen. Her sire Itozuru Doi 151 is considered the greatest carcass sire by A to Z Feeders, the biggest wagyu F1 feedlot in North America with 10,000+ F1's and fullbloods on feed. They have hundreds of black wagyu fullblood bulls they use to make F1's and the sire of the vast majority of them is a clone of Itozuru Doi 151. Here you have an Akaushi sire line bred the greatest Akaushi bull of all time bred to what may be the largest framed, highest growth high Tajima dam in North America, who just happens to be a direct daughter of the highest rated commercial black wagyu bull by the largest wagyu feedlot outside Japan and Australia. 'Nuff said!

## HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy your livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com).

### HERE'S HOW IT WORKS

**Turn in Bids Over the Phone.** This is our traditional method of buying livestock. To get started simply go online to [www.superiorlivestock.com](http://www.superiorlivestock.com) and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

**Click-To-Bid.** This is Superior's newest way to buy livestock! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to sign up. Becoming a member is easy – just go to the homepage of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

**Viewing the Auction.** The sale will be broadcast live on the internet at [www.superiorclicktobid.com](http://www.superiorclicktobid.com) – just go to the home page and select the auction. Remember, you can call in to bid over the phone when watching on the internet if you have registered for that service, but you must be a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to "click-to-bid" and bid online. Your computer must have Flash Media Player installed to view the auction.

Bidders who are successful in making purchases will be contacted by Superior Productions after the sale to settle payment and discover your shipping plans.

# IF YOUR'RE IN THE CATTLE BUSINESS

You get paid in pounds of beef

**TRU-TEST™**

**WEIGHING** - helps you make educated business decisions based on facts created by Tru-Test scale systems.

Slaughter Fee \$75 per head

Processing Fee \$0.99/lb of carcass weight

# GRAHAM

## *Land & Cattle Co.*

GONZALES, TEXAS

Graham Land and Cattle Company is the leader in South Texas cattle feeding and investing. We have been producing high quality beef along with high quality service since 1987. Here at Graham Land and Cattle Company, we also offer three main investment programs that focus on diversification, resource utilization and risk management. These three programs revolve around "the landowner, investor, and producer."

- Retained Ownership Planning
- Heifer and Bull Development Program
- Customized Feeding Wagyu and Japanese Influence Cattle
- Age & Source / Non-hormone Feeding Available
- Specialized Feed By-Products
- 15,000 head Pasture Growing Program
- Cattle & Feed Financing
- Risk Management
- TCFA Beef Quality & Safety Assurance Certified

# Semen Available...

## **RUESHAW II**

This bull has risen to be one of the best marbling Red Wagyu/Akaushi bulls in the breed. He is dual registered with the AWA and the American Akaushi Association. He was a 2,100 lb bull at two and a half years of age. 312 calves harvested to date. 90+% graded high prime or better. He sired the Grand Champion Black/Red female at Denver and Houston Stock Shows, as well as, the Reserve Champion et of Sire at Denver.

Contact Rod Solar at 210-488-3700 for semen or an opportunity to own this bull.

## **POPEYE**

Popeye has proven to be everything we ever wanted. His calves are prized in the herds that have them. His dam is my Super Heifer cow that I wouldn't take any price for and his sire is the great Umamaru. He currently weighs 2,460 lbs, and was 2,000 lbs as a two and an half year old. 272 calves harvested so far and 90% have been high prime or better with the feeder calf buyers asking for more.

Contact Burch Wallace at 940-393-6620 for Semen.
